

# Sustainable computer vision for autonomous machines

Bartosz Zieliński

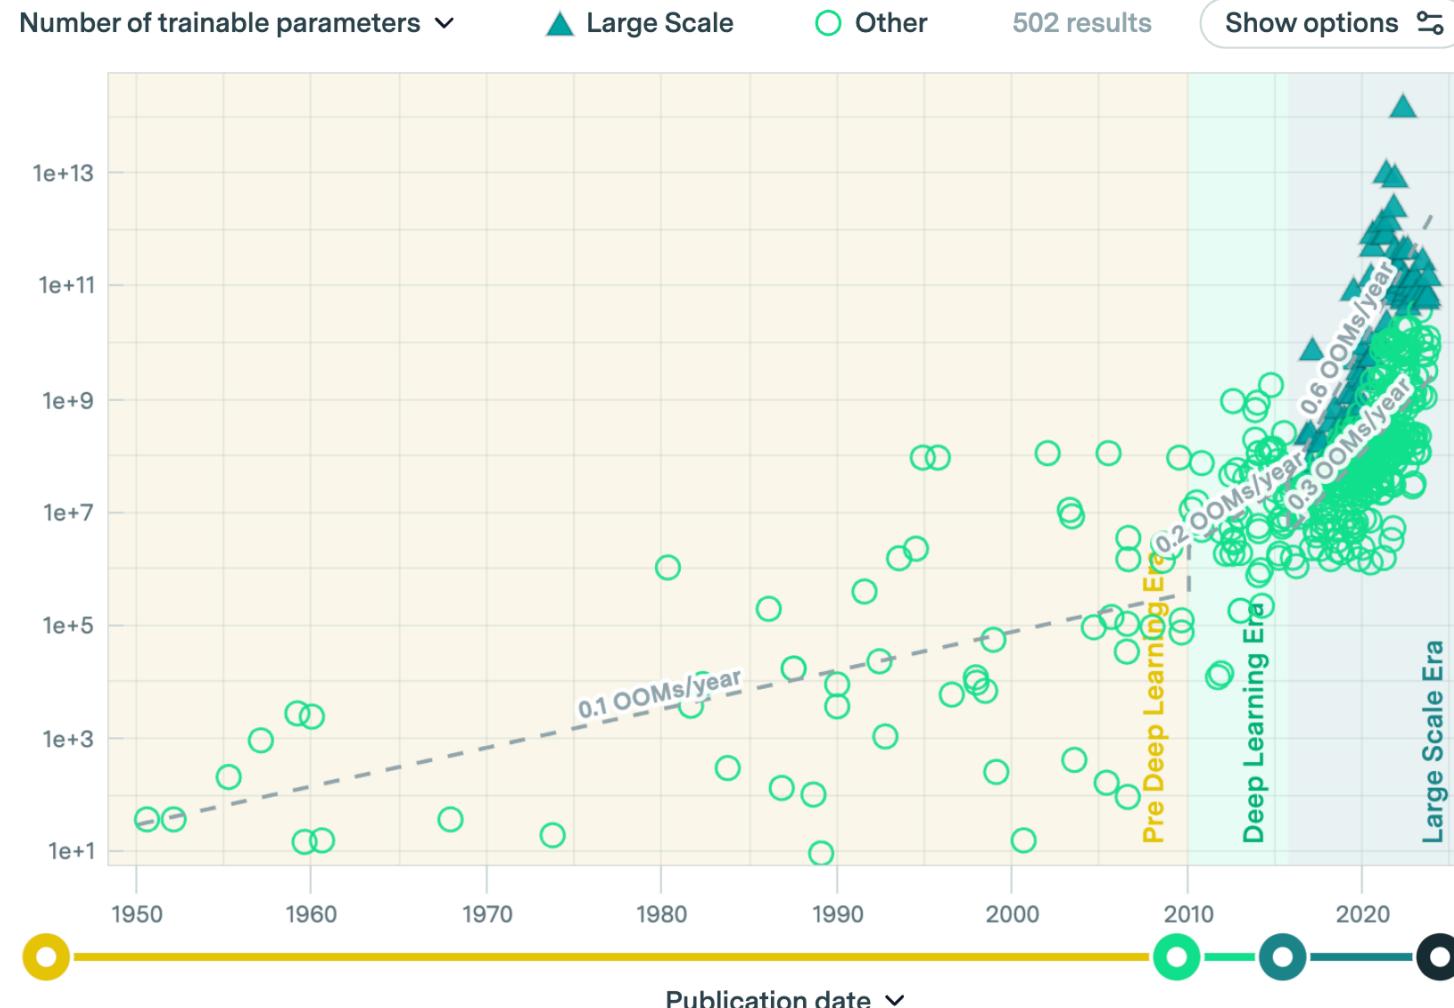

**IDEAS**  
NCBR

- + Occupation
  - + Associate Professor @ JU (SINN, GMUM)
  - + Research Team Leader @ **IDEAS NCBR**
- + Education
  - + PhD @ IPPT PAN
  - + Habilitation @ PWr
- + Two research teams
  - + Sustainable and interpretable neural networks (JU)
  - + **Sustainable computer vision for autonomous machines (IDEAS)**

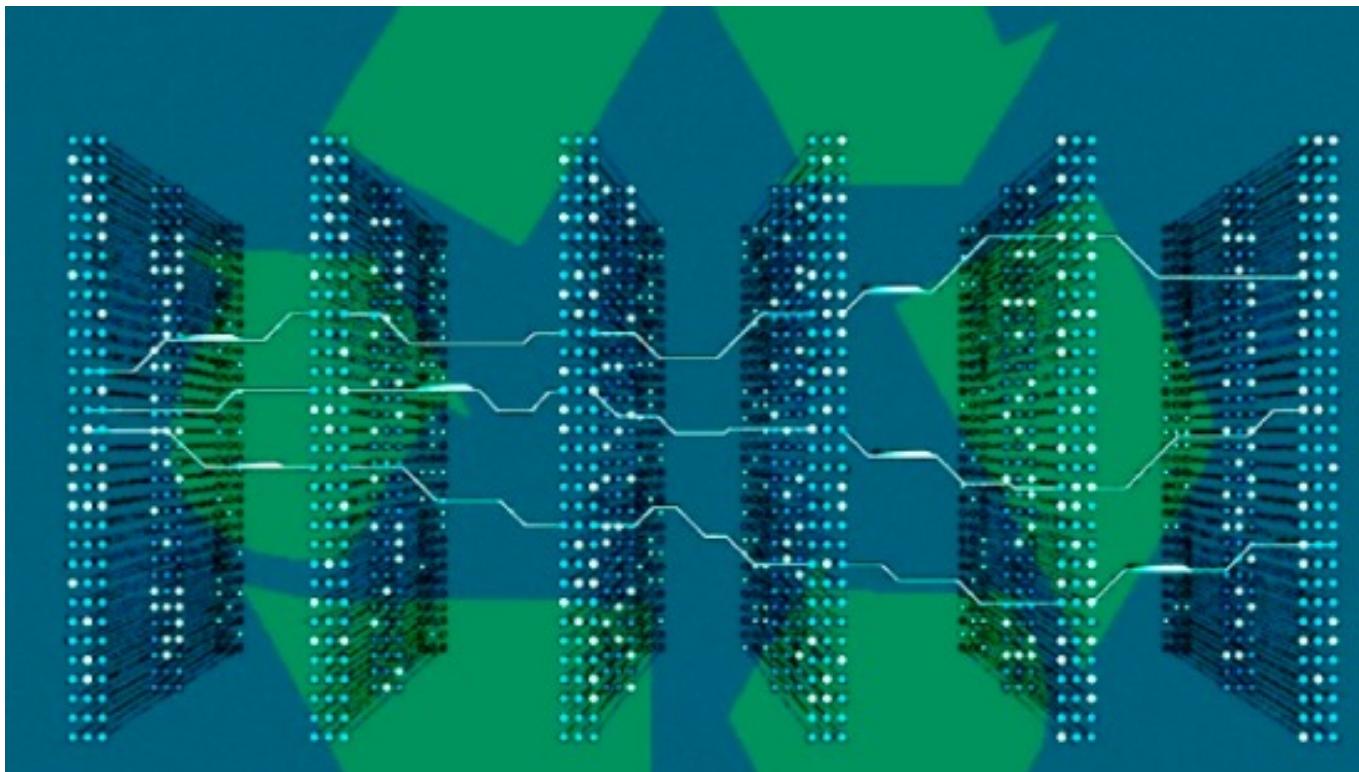

# ML uses more and more computational resources

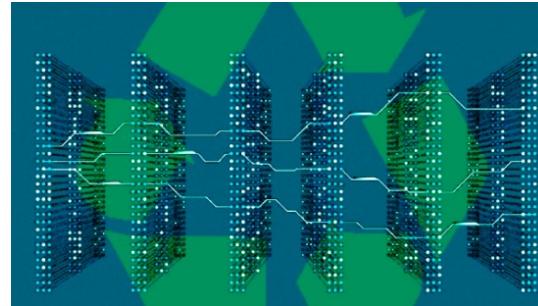

# Sustainable machine learning

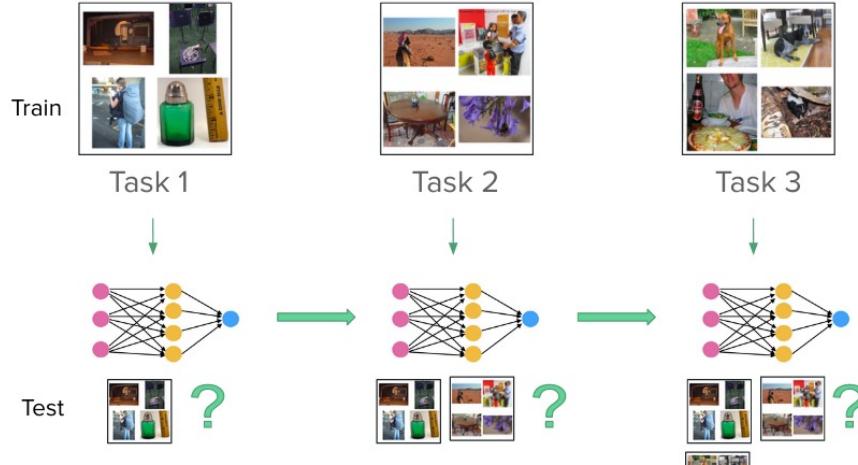

- + Sustainable AI deals with the problem of the ecological impact of AI development.
- + Research in this area focuses on reducing this impact, e.g. by recycling models trained so far.

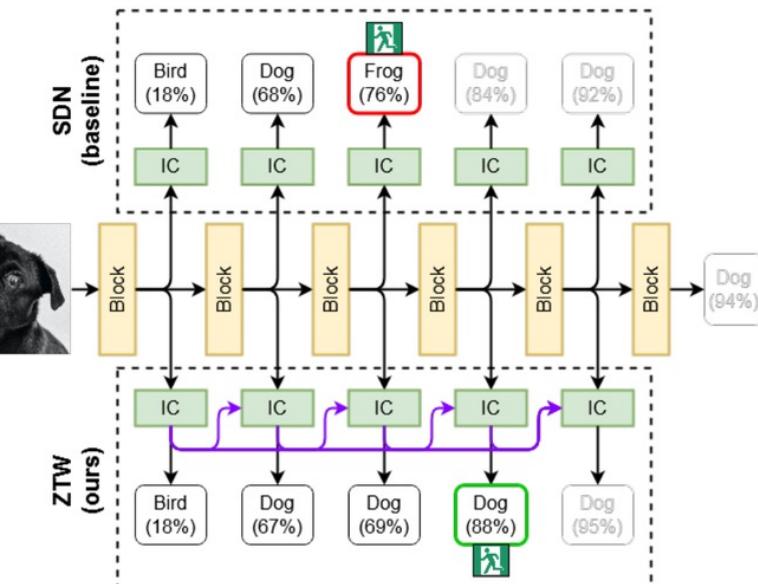

# Zero-waste machine learning in computer vision

## continual learning

## conditional computations

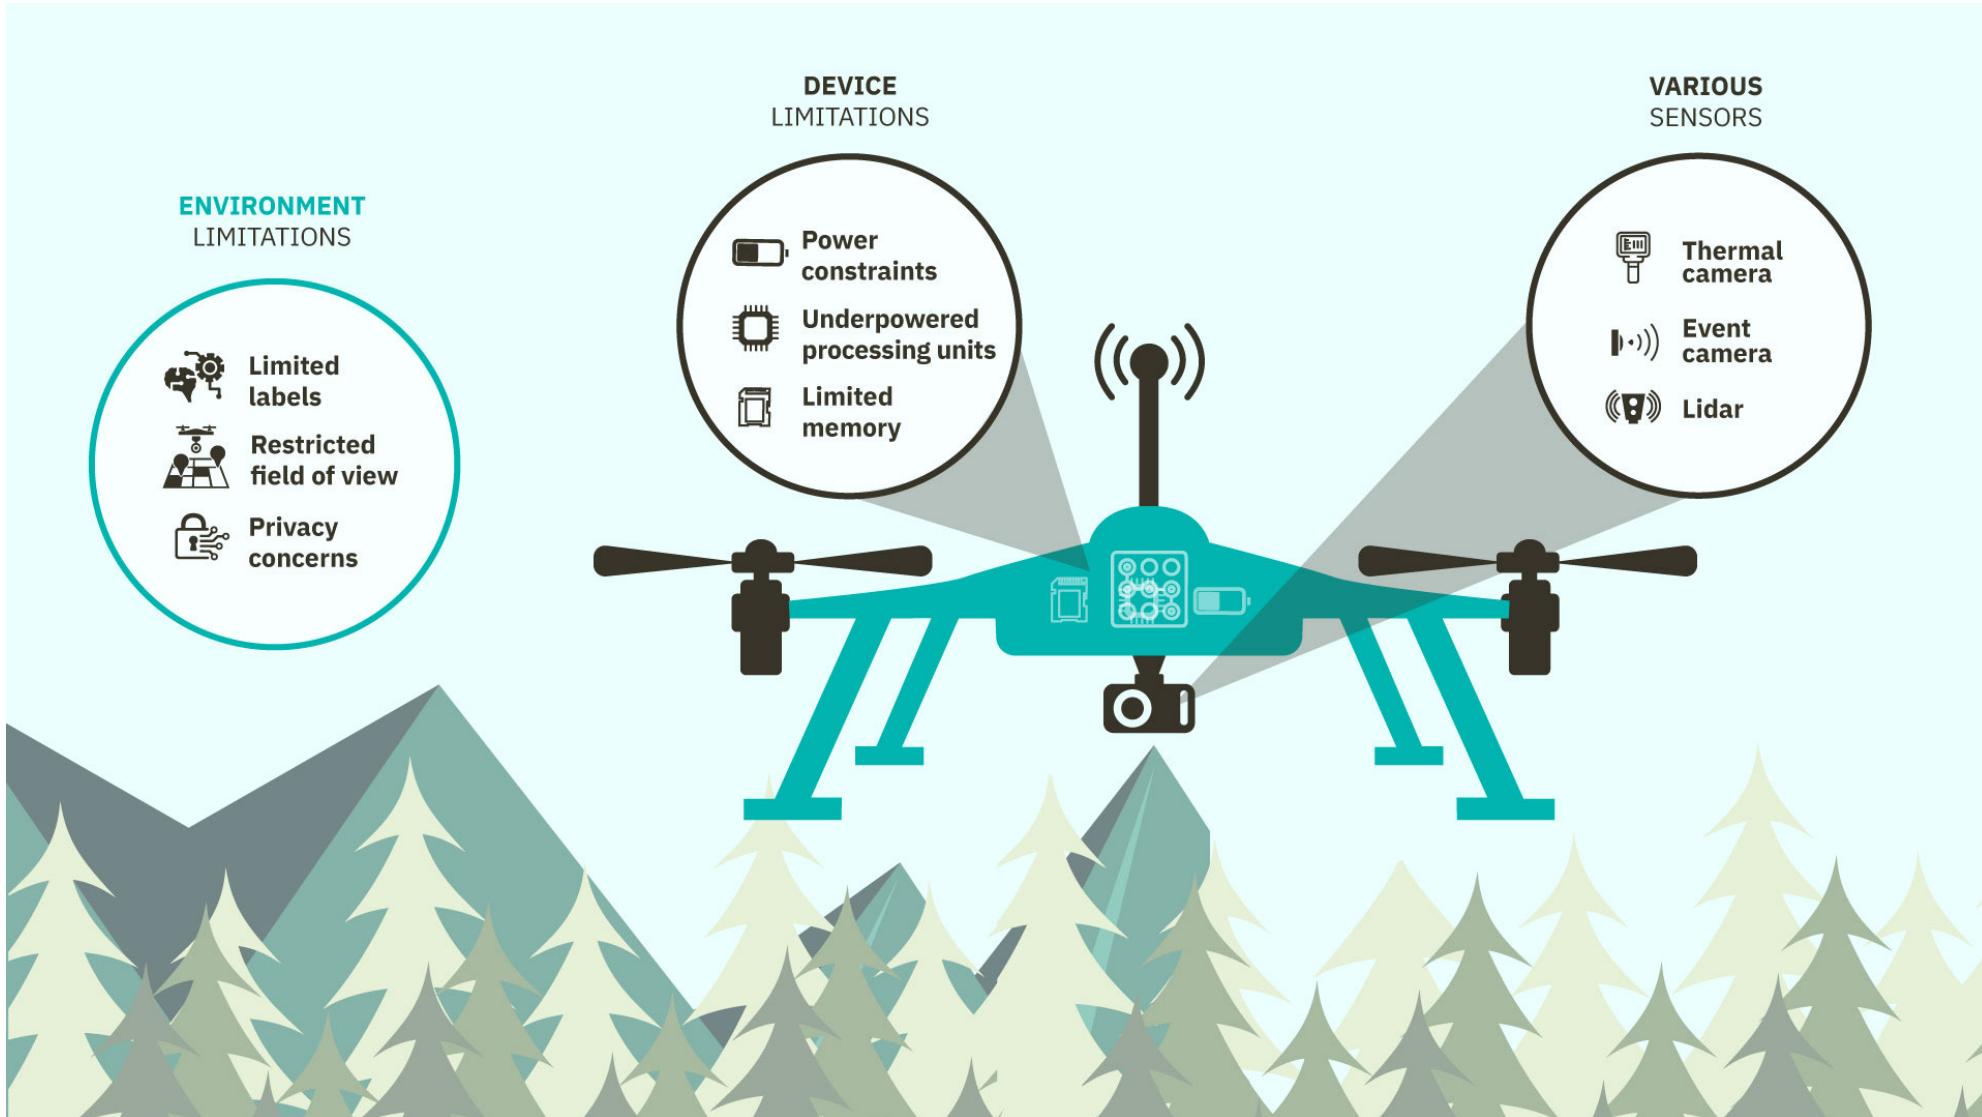

# How far we are from reality (autonomous machines)?

- + Do setups we consider, e.g. in continual learning, are realistic?
- + What is the real energy consumption of our conditional methods?
- + What are the other open questions in autonomous machines related to sustainable computer vision?

# Sustainable computer vision for autonomous machines

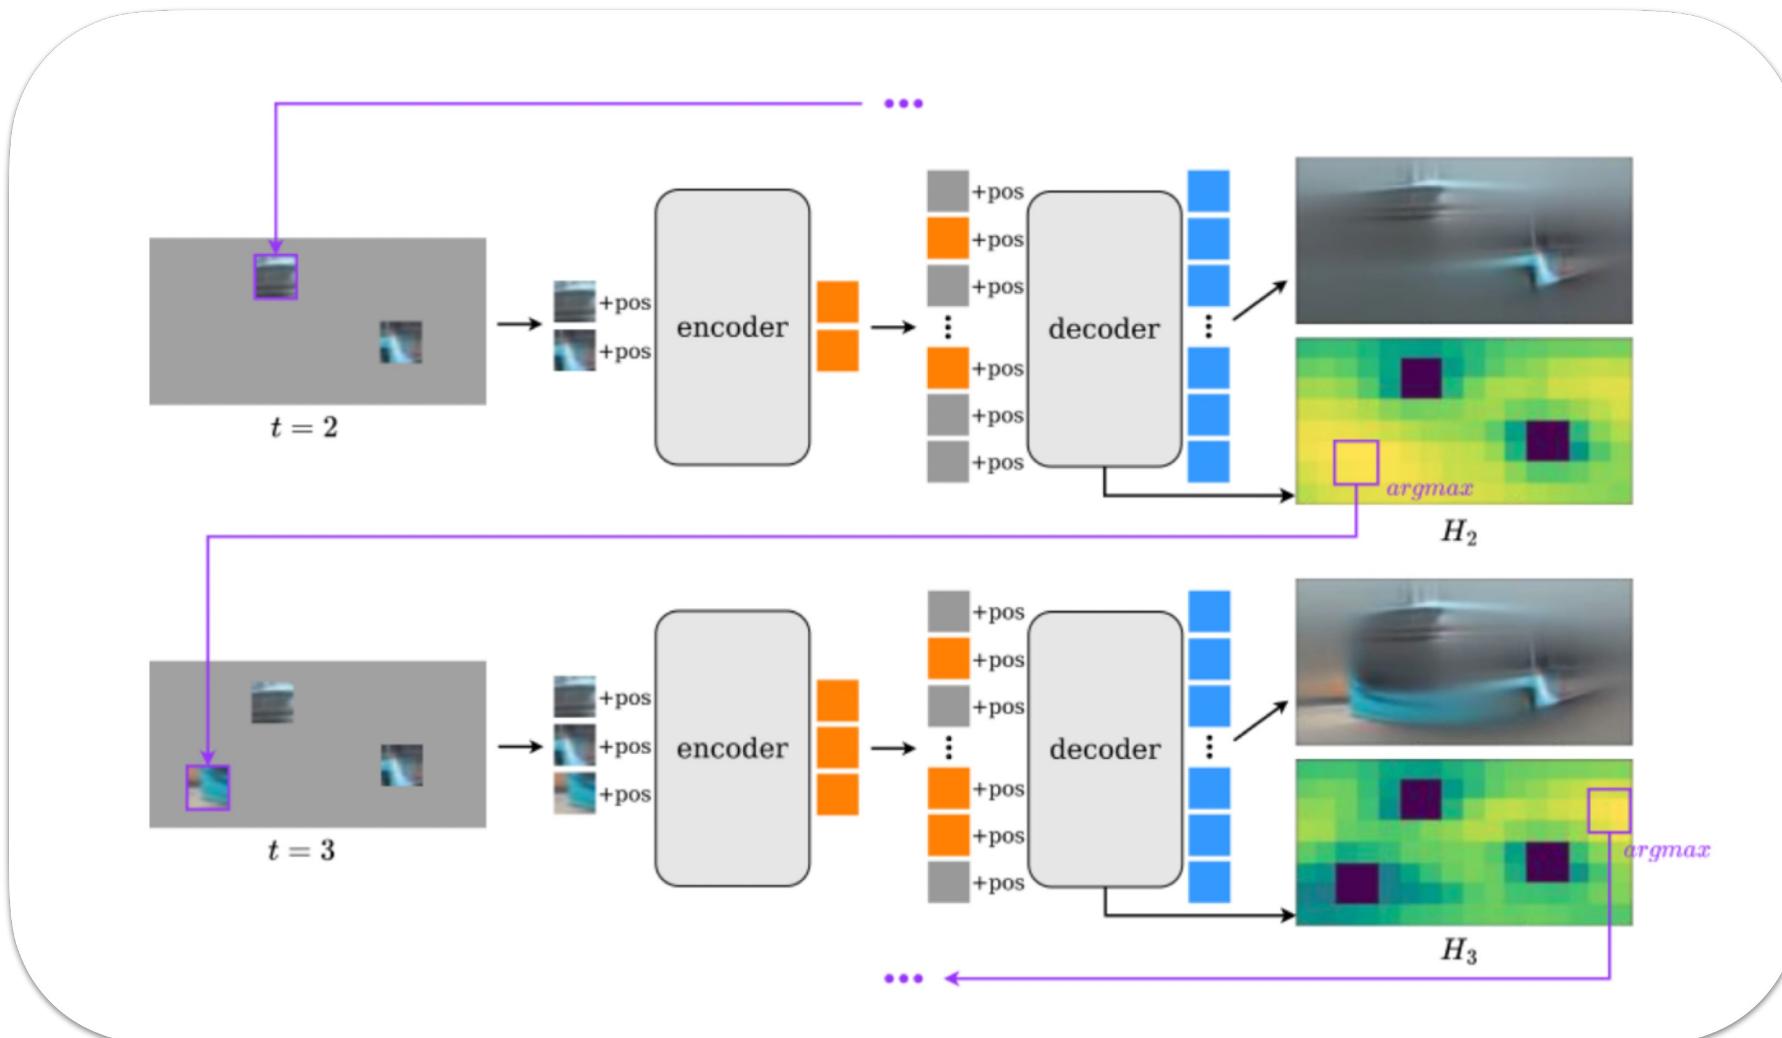

# Active visual exploration

- + Adam Pardyl, Grzegorz Rypeść, Grzegorz Kurzejamski, Bartosz Zieliński and Tomasz Trzciński
- + Active visual exploration based on attention-map entropy
- + IJCAI 2023

# Active Visual Exploration

# How it works

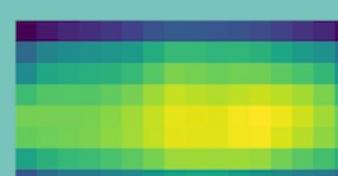

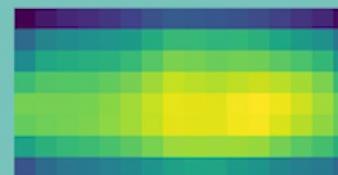

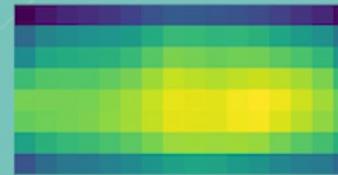

**Input**

**Prediction**

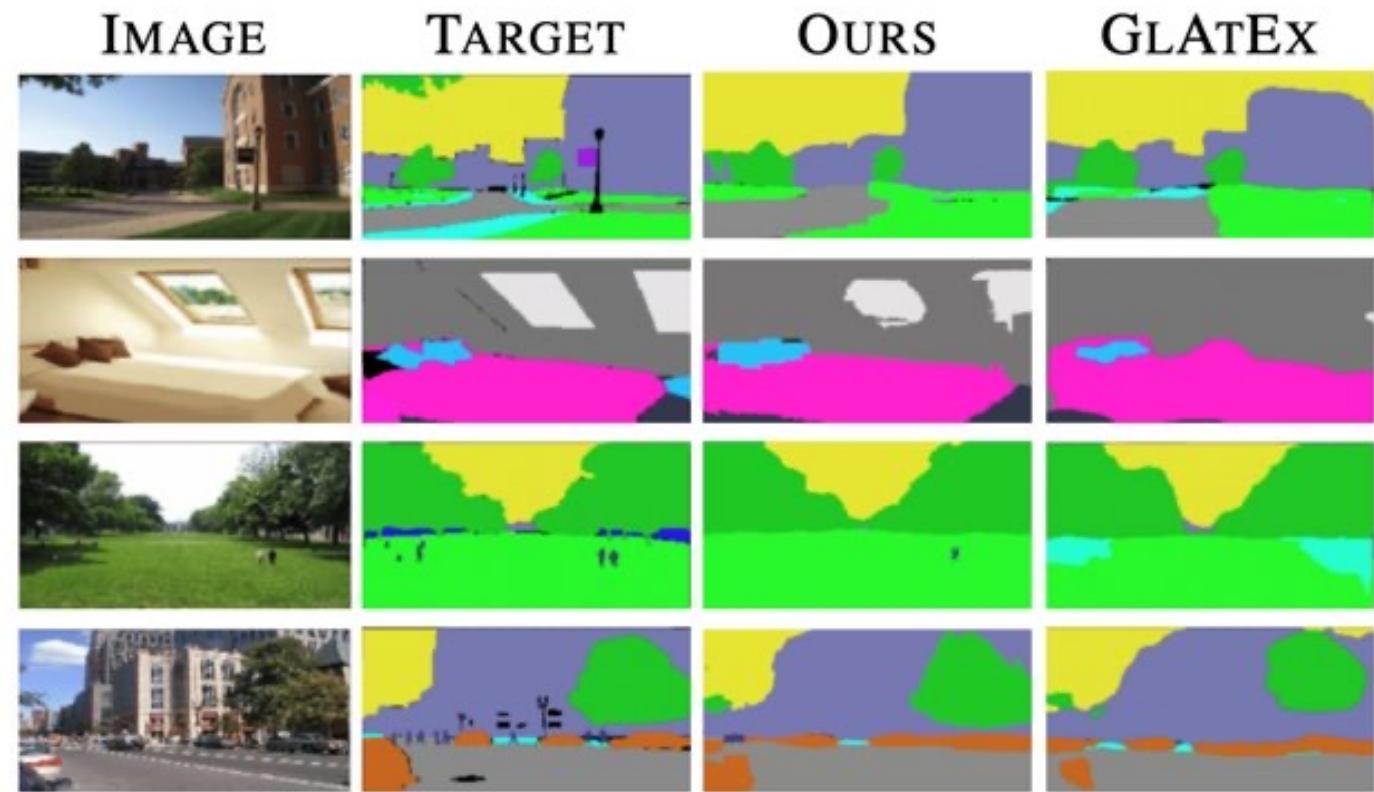

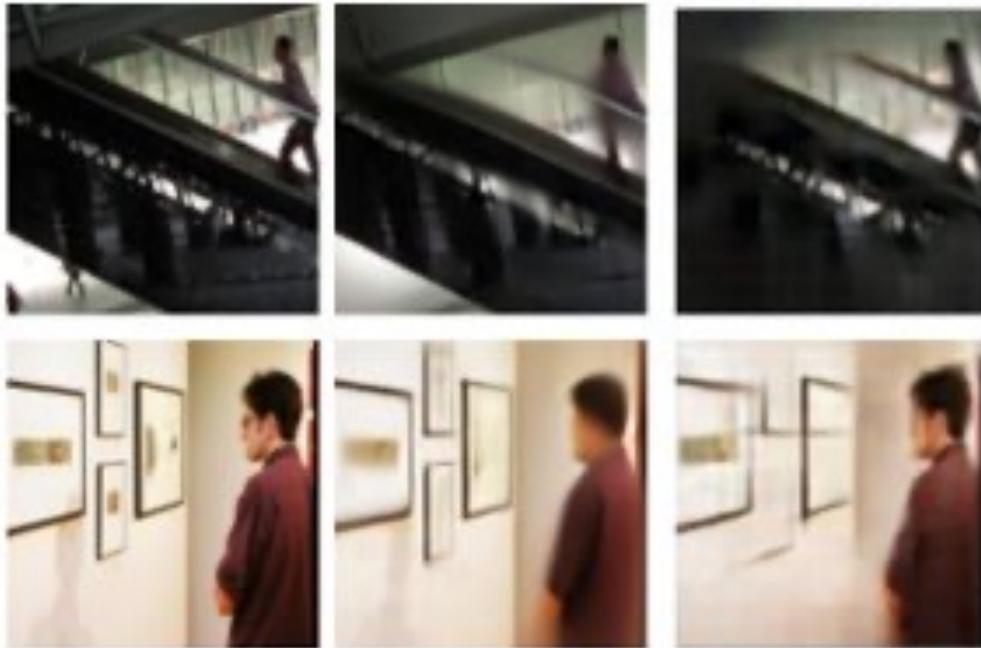

**Uncertainty**

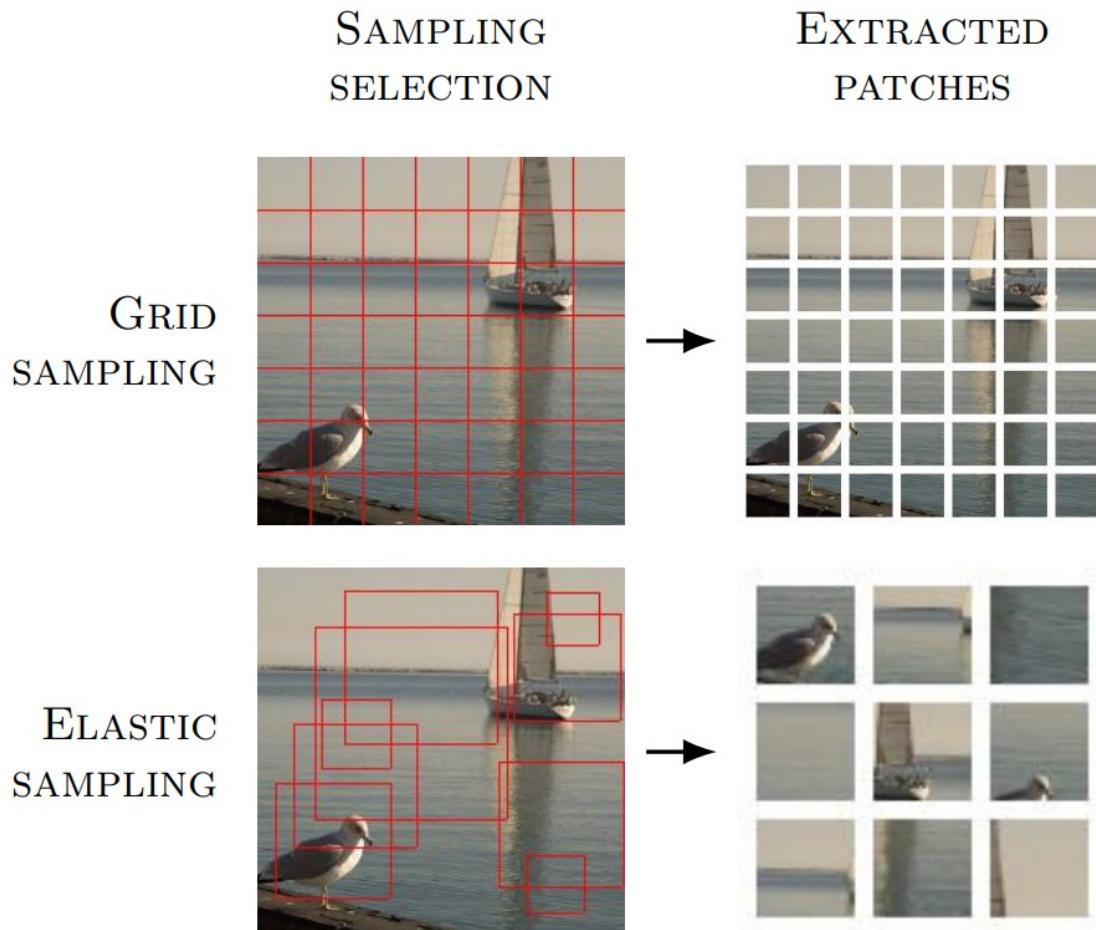

## Active Visual Exploration

INPUT    OURS    SIMGLIM

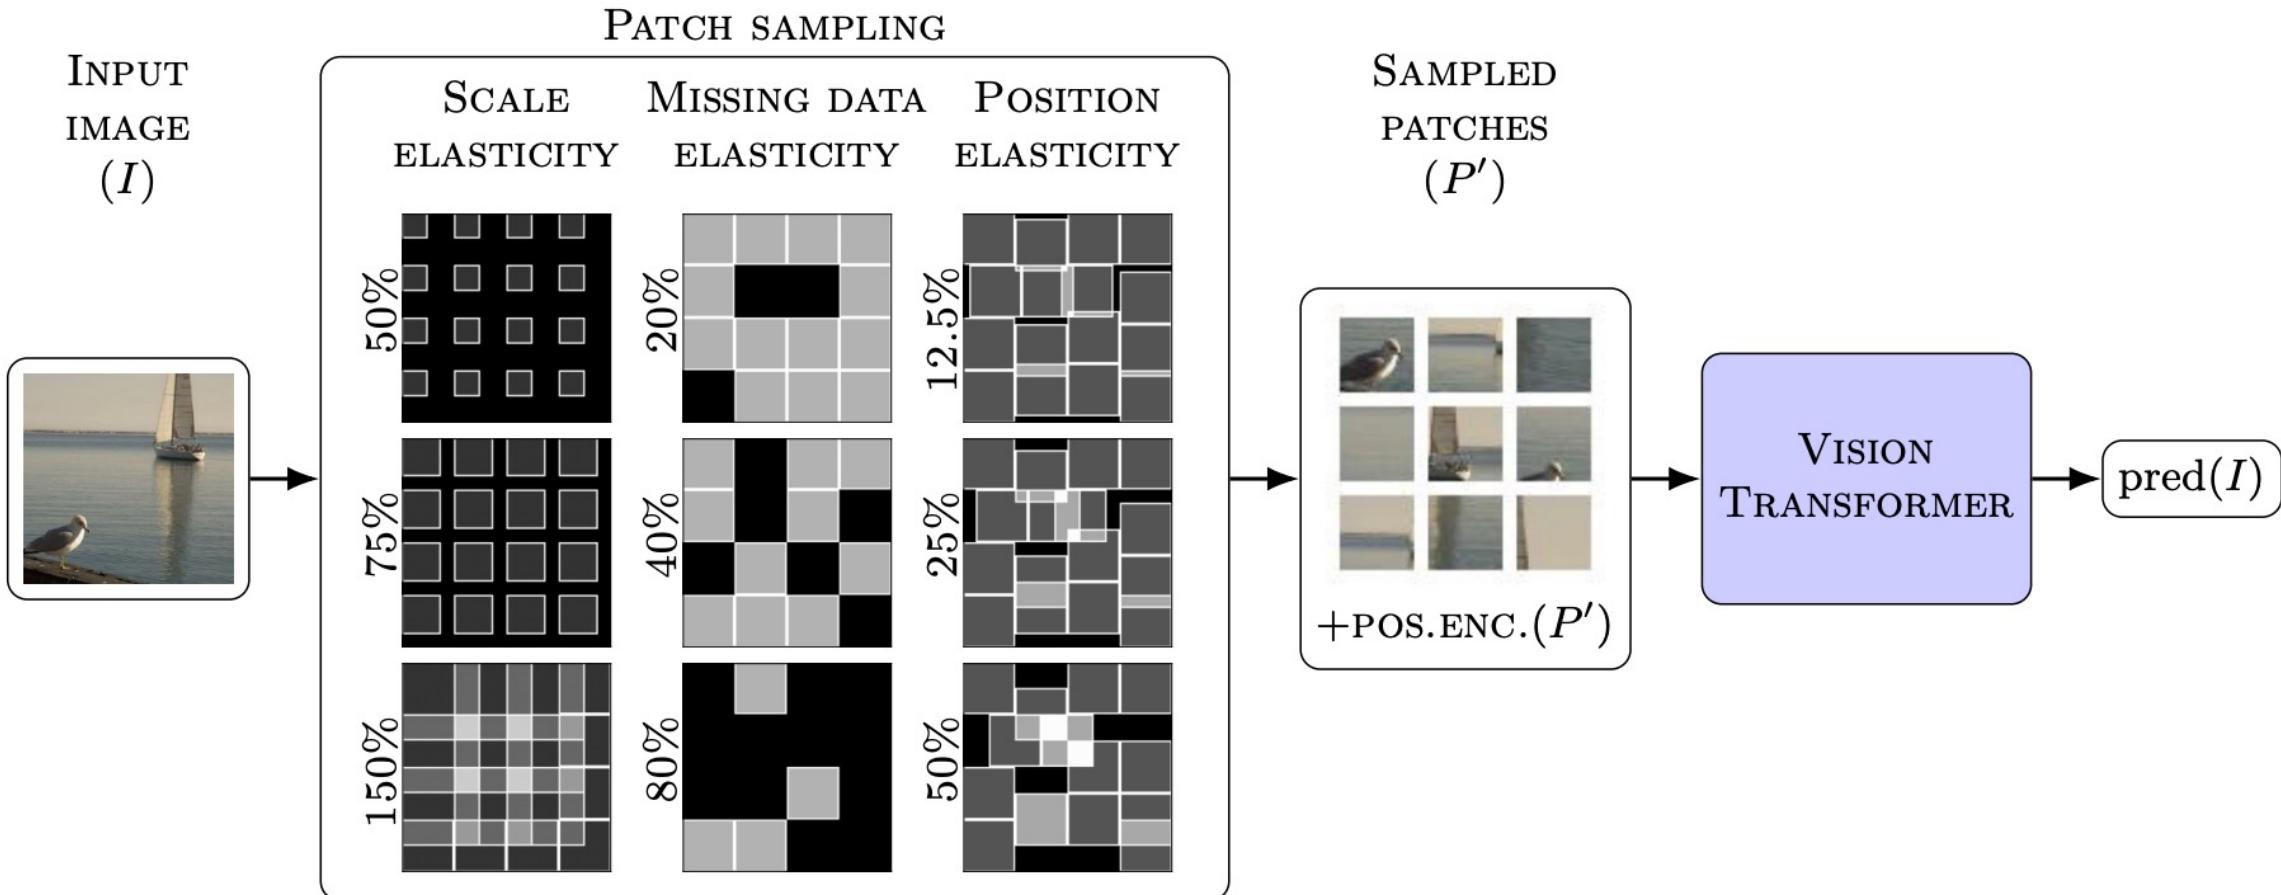

# Transformers beyond grids

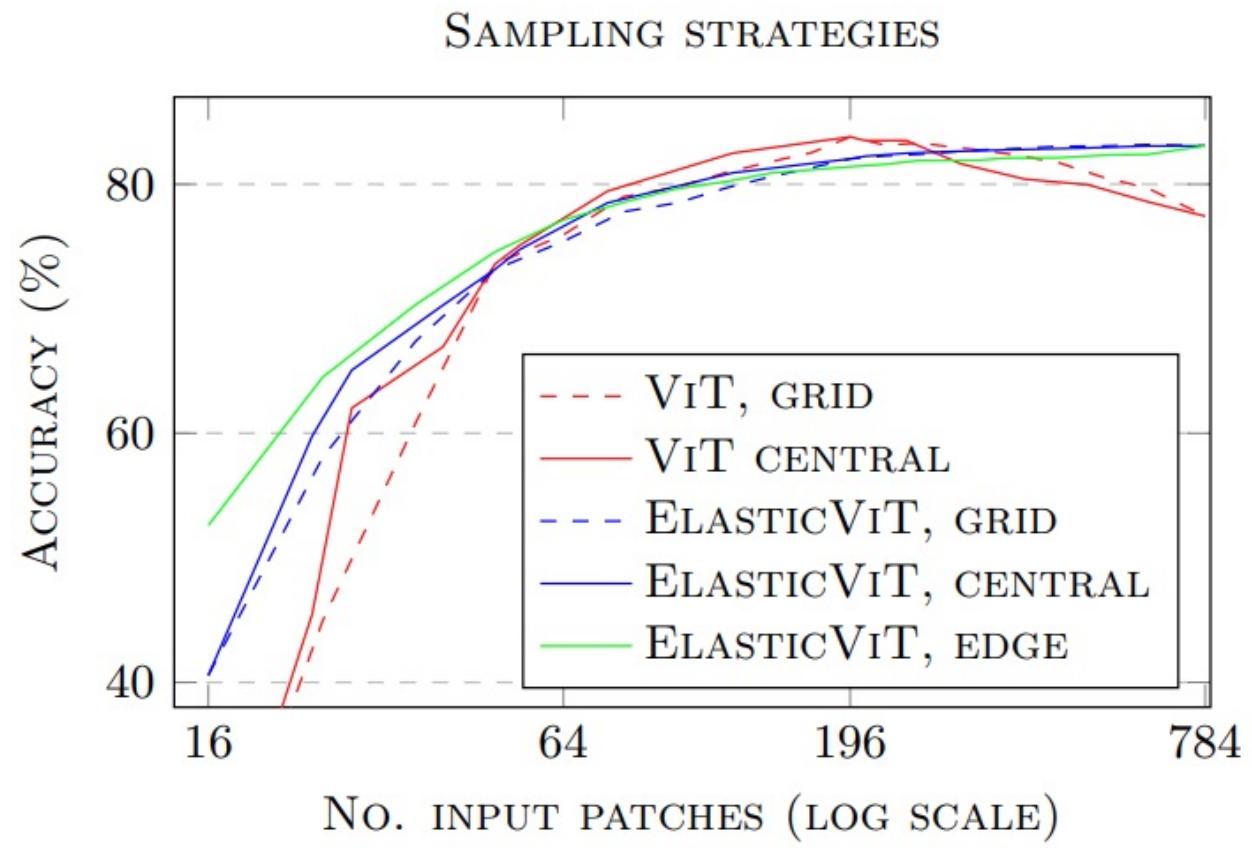

- + Adam Pardyl, Grzegorz Kurzejamski, Jan Olszewski, Tomasz Trzcinski and Bartosz Zieliński
- + Beyond Grids: Exploring Elastic Input Sampling for Vision Transformers
- + SDM submission

# Transformers beyond grids

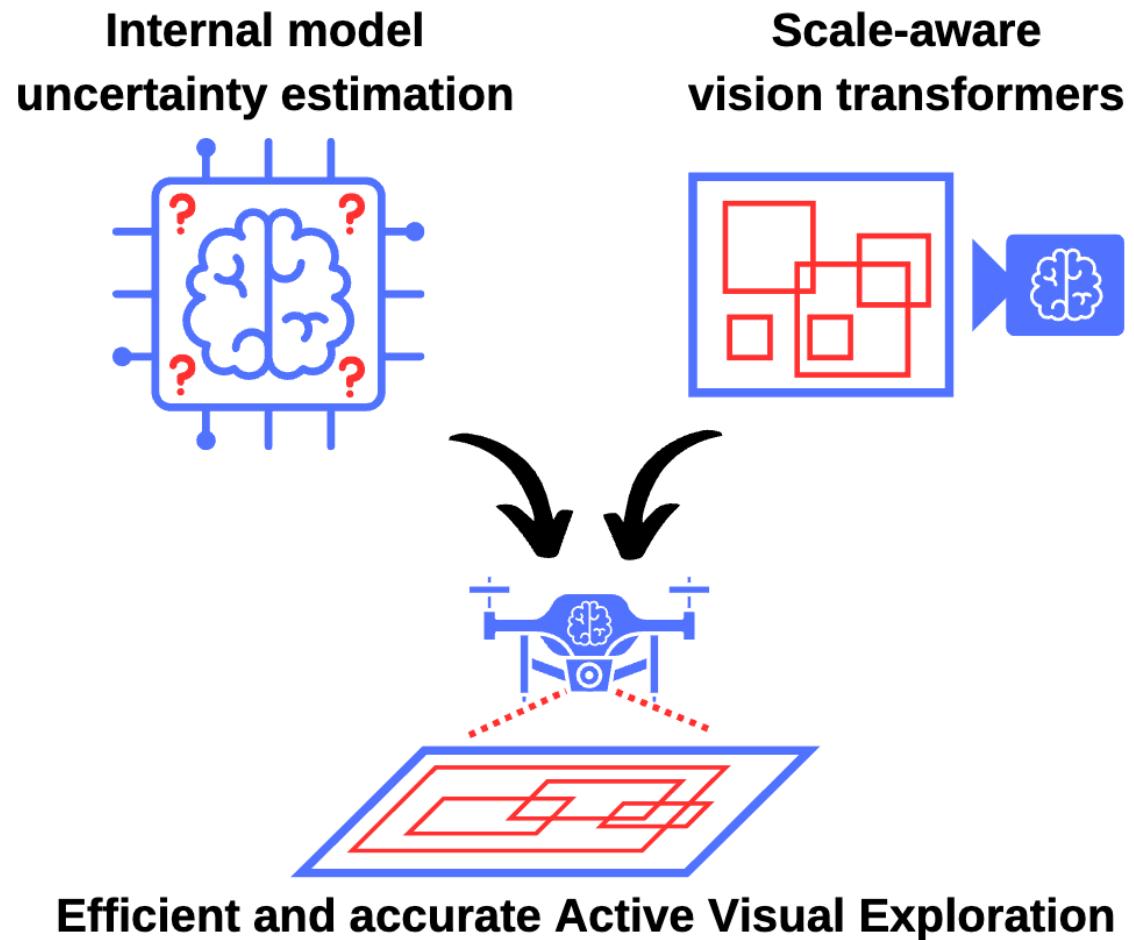

# Transformers beyond grids

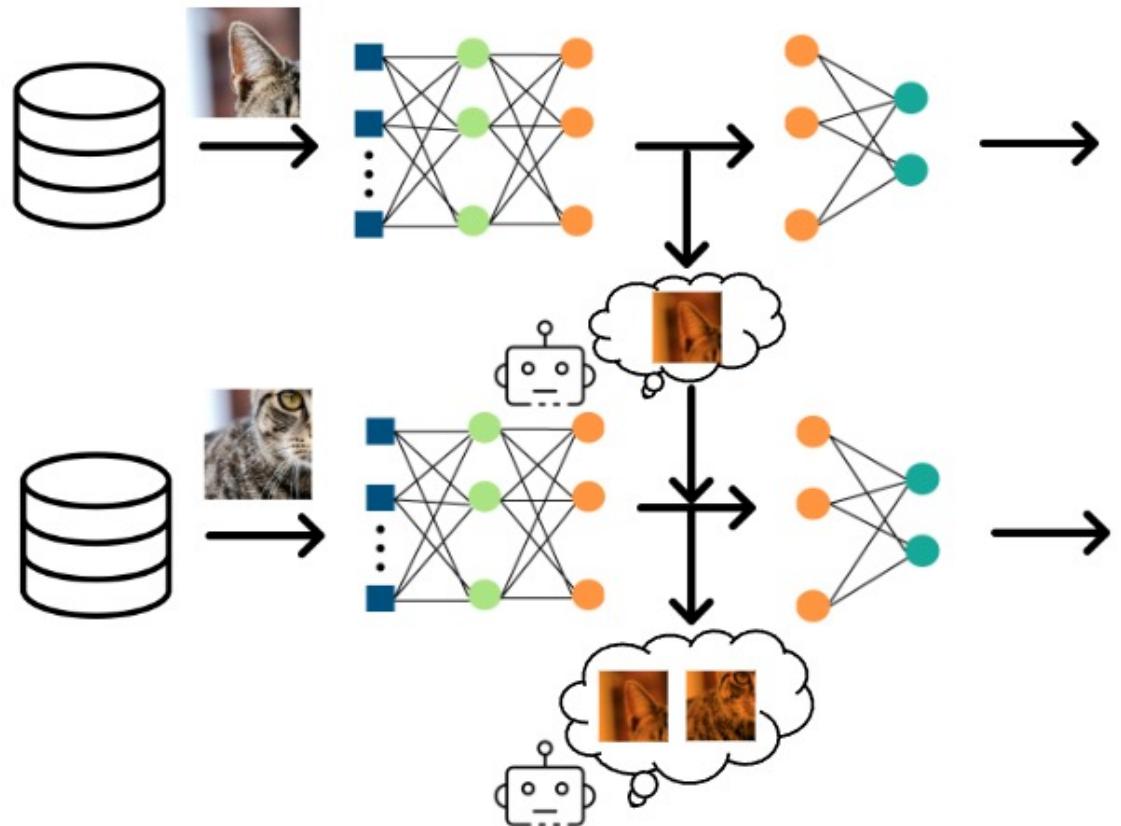

# Active visual exploration beyond grids

+ Adam Pardyl, Bartosz Zieliński and Kamil Adamczewski

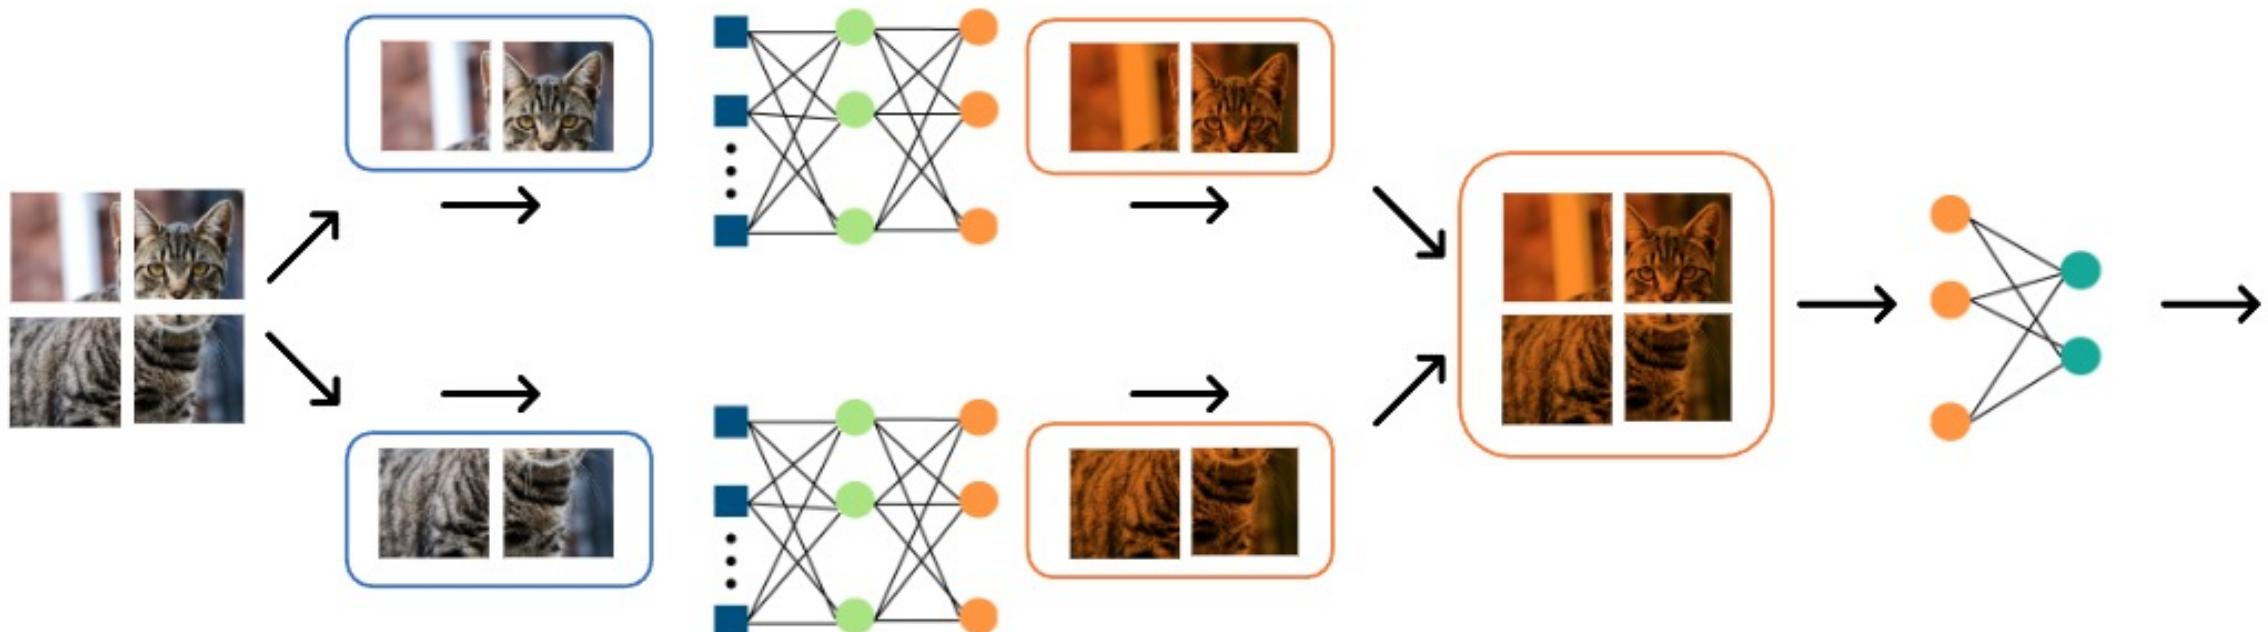

# Token recycling

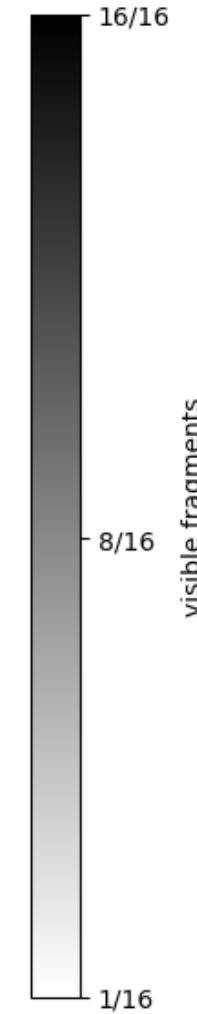

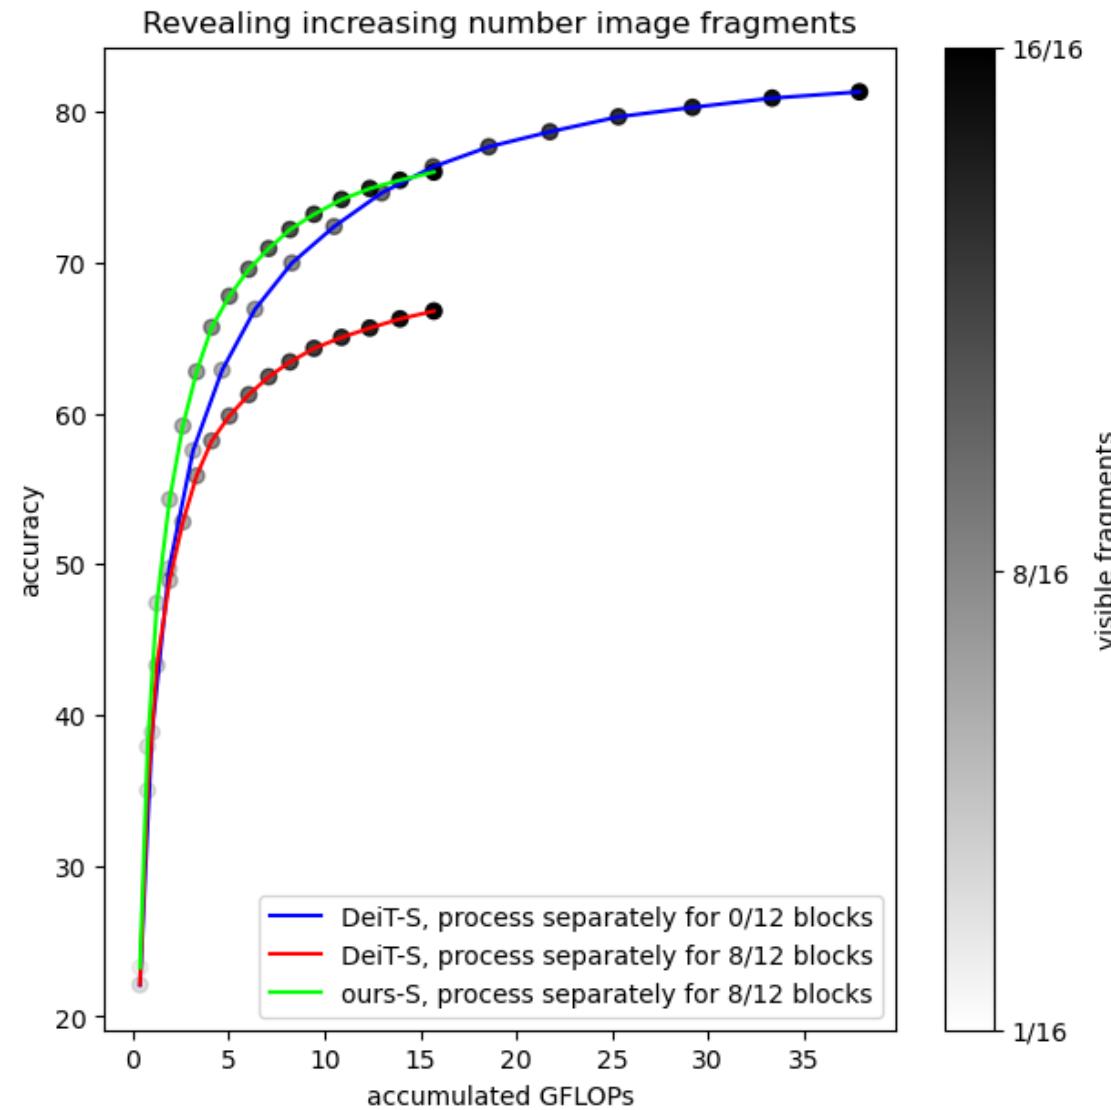

- + Jan Olszewski, Piotr Wójcik, Dawid Rymarczyk and Bartosz Zieliński
- + Token Recycling for Efficient Sequential Inference with Vision Transformers
- + CVPR submission

## Token recycling

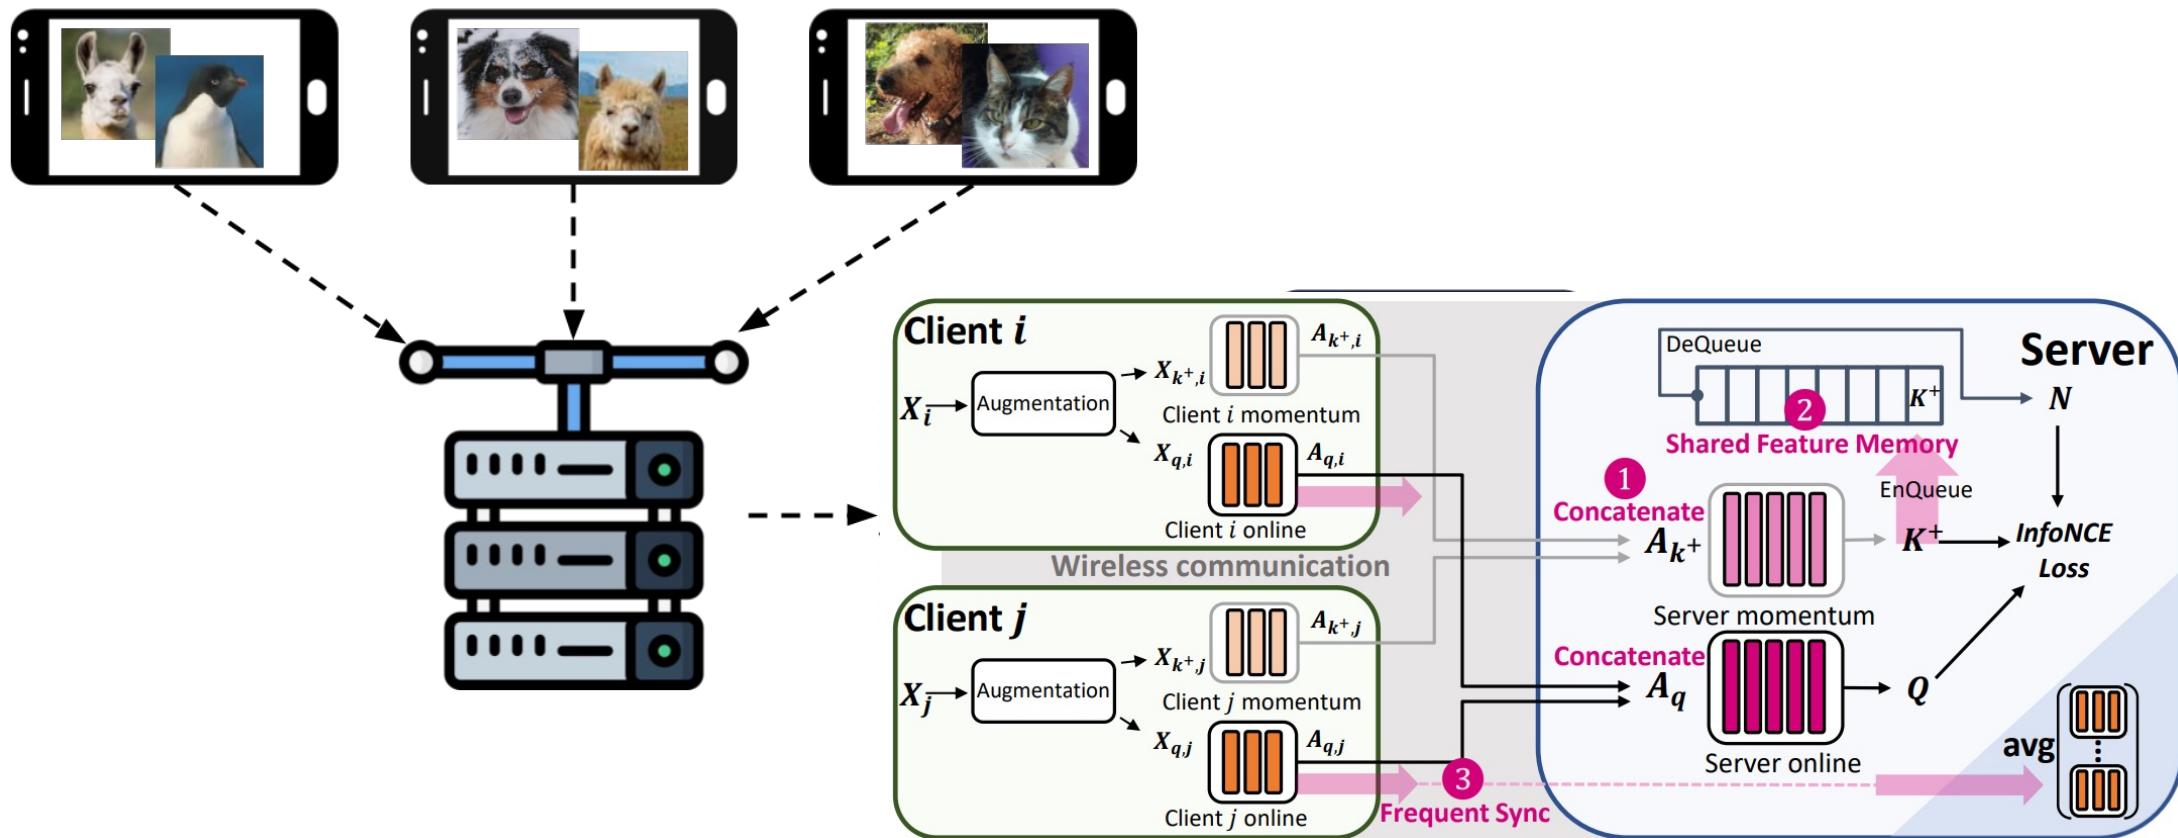

# Token recycling

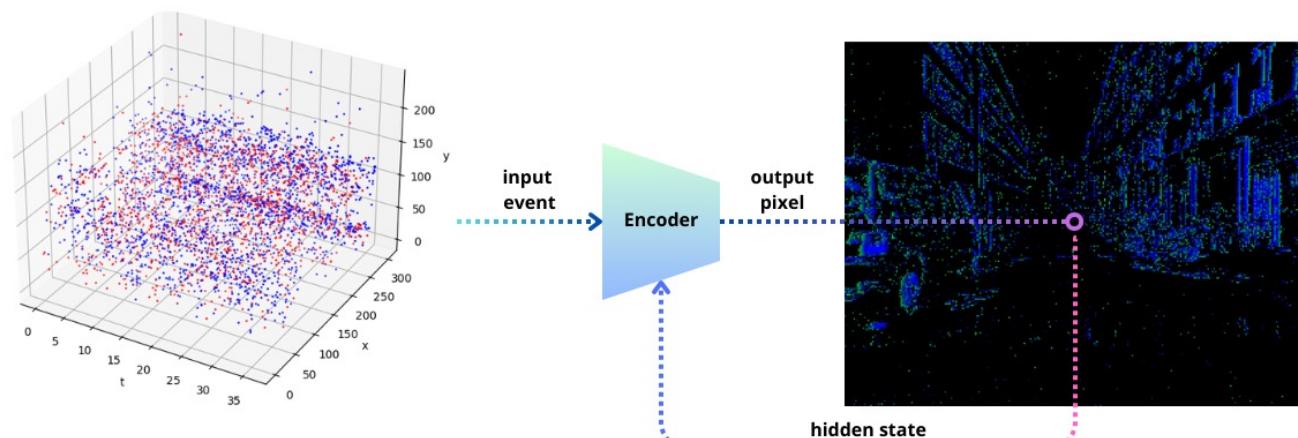

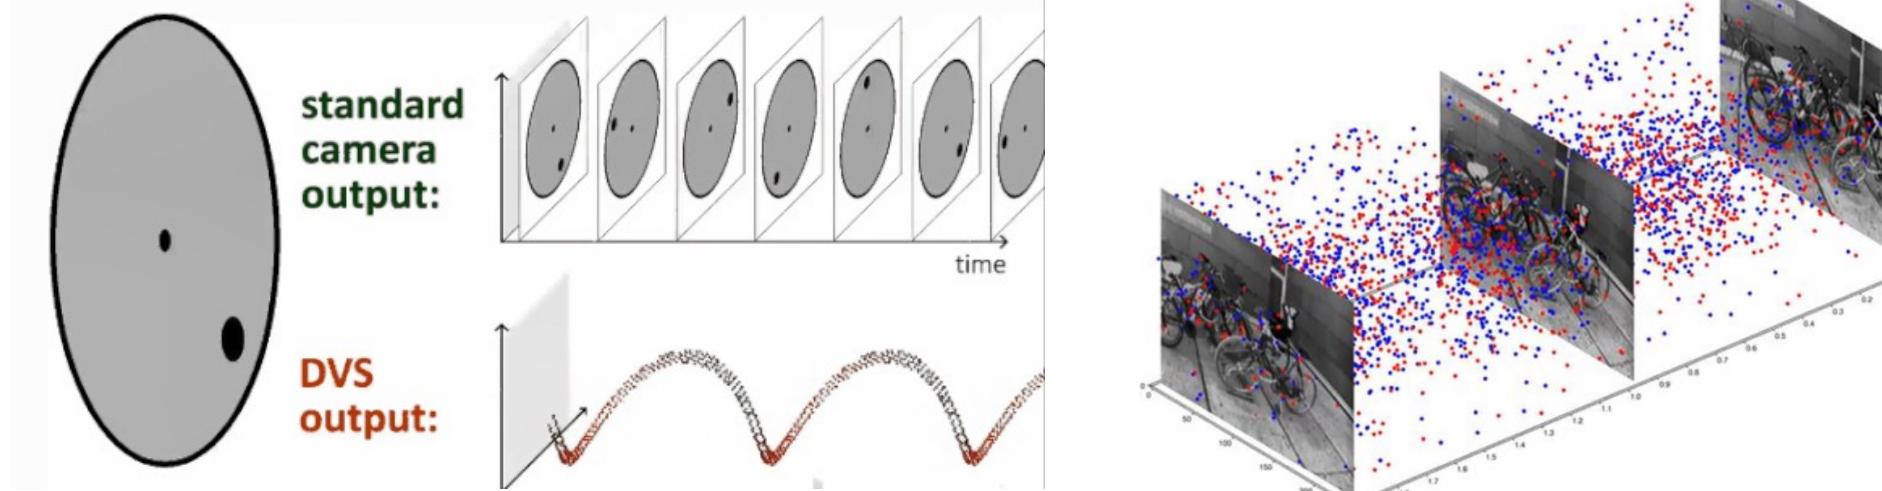

# Federated representation learning

+ Marcin Przewięźlikowski, Marcin Osial, Marek Śmieja and Bartosz Zieliński

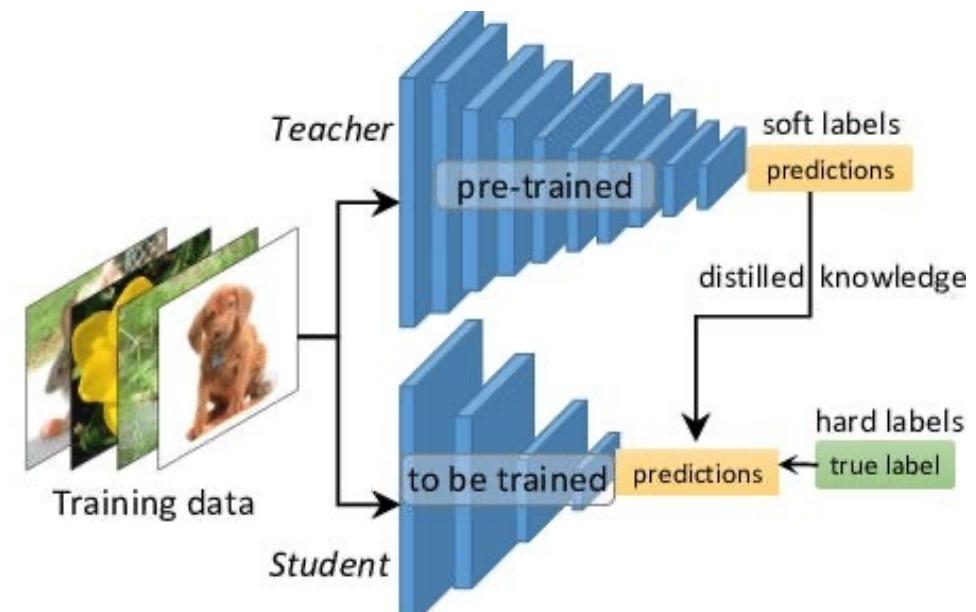

# Learning representation of events

+ Kamil Jeziorek, Adam Pardyl, Tomasz Kryjak and Bartosz Zieliński

# Cross-modal distillation

+ Marcin Osial, Dawid Migacz, Maciej Zięba, Bartosz Zieliński and Kamil Adamczewski
